SUMMARY

Product-minded Program Manager with 8 years of experience building and scaling marketplace, commerce and supply chain initiatives across B2B Healthtech, Quick Commerce and Logistics. Experienced in identifying high-impact customer and business problems, validating hypotheses through data, defining product direction and leading cross-functional execution to measurable outcomes. Delivered initiatives that reduced RTO losses by INR 2.2Cr/month and built a new marketplace category to INR 1.28Cr GMV. Seeking Product Manager opportunities across marketplace, commerce and platform products.

EXPERIENCE

Program Manager, Product Marketplace - Medikabazaar (Healthtech) Jan 2025 – Present

Owned a 0-to-1 product charter to INR 1.28Cr GMV *Mumbai*

- Built a new Ophthalmology marketplace category from INR 0 to INR 1.28Cr GMV by analysing customer economics, identifying financing rather than supply as the key adoption constraint and launching an EMI-led commercial model with Siemens Financial Services.
- Defined the category roadmap by prioritising OEM partnerships, assortment expansion and commercial readiness, onboarding 12 partners and launching 200+ SKUs across six sub-categories.
- Investigated stalled marketplace conversion using buyer behaviour and unit economics, replacing a flat-margin marketplace model with an affordability-led financing proposition that improved commercial viability.
- Led development of an AI-powered lead qualification workflow integrated with CRM, instrumenting funnel stages that reduced 100-150 daily enquiries to 20-30 qualified opportunities while consistently generating 2-3 high-value equipment sales each month.
- Partnered with business, operations and engineering teams to launch fulfilment exception monitoring with automated alerts and ownership workflows, reducing supplier turnaround time from 10-12 days to 5-6 days while sustaining 92% SLA adherence.
- Negotiated commercial partnerships and exclusive online selling rights across 12 OEM and third-party partners, strengthening catalogue differentiation against competing marketplaces.

Process Excellence Manager, Product Operations - Zepto (Quick Commerce) Jul 2024 – Jan 2025

Owned WMS delivery; improved order accuracy to 98.8% *Gurgaon*

- Led end-to-end rollout of a warehouse management system across 50 dark stores, improving order accuracy from 97.2% to 98.8% while increasing picker productivity by 18%.
- Partnered with warehouse operators, product, engineering and operations teams to validate workflows, conduct UAT and drive adoption across 200+ users without disrupting live customer orders.
- Defined launch readiness metrics and rollout playbooks that enabled 18 new dark stores to achieve 100% Day-1 operational SLA.
- Used operational data to design peak-volume contingency plans covering inventory allocation, workforce planning and partner coordination, sustaining 98.1% on-time delivery during 2.5x demand spikes.

Program Lead, Logistics & Trust - Udaan.com (B2B Marketplace) Jul 2021 – Feb 2024

Cut RTO losses by INR 2.2Cr/month via product-led discovery *Bangalore*

- Identified last-mile fraud rather than warehouse operations as the primary driver of INR 2.5Cr/month RTO losses by analysing 2M+ shipment records, reframing a long-standing organisational problem and aligning stakeholders on a new solution approach.
- Built the business case for a tamper-proof tracking solution by quantifying financial impact, validating feasibility through pilot results and securing leadership approval for a phased national rollout across 14 warehouses.
- Led cross-functional delivery of TPID tracking across logistics, operations and technology teams, reducing monthly RTO losses from INR 2.5Cr to INR 30L and generating an estimated INR 2.2Cr monthly business impact.
- Defined success metrics and implemented real-time Power BI dashboards to replace manual reporting, improving last-mile delivery speed by 20% and reducing customer escalations by 30% across 14 warehouses.

City Manager, Growth & Operations - EatClub (D2C Food Commerce)

Jan 2018 – Sep 2020

Scaled consumer growth and operations across a multi-outlet food commerce business

Bangalore

- Scaled city revenue from INR 4Cr to INR 5Cr per month by launching a new consumer brand across 33 outlets, coordinating commercial rollout, operations and go-to-market execution.
- Improved single-outlet revenue from INR 12L to INR 23L per month within six months by continuously optimising menu availability, production readiness and customer fulfilment processes.
- Built an automated demand forecasting process across 33 outlets that reduced food wastage from 9% to 8% of revenue while improving on-time delivery SLA from 90% to 95%.

EDUCATION

B.E. Mechanical Engineering

2016
